

Gender and sexual diverse persons in Uganda face a lot of challenges

State and police violence...

Risks to their physical and mental health...

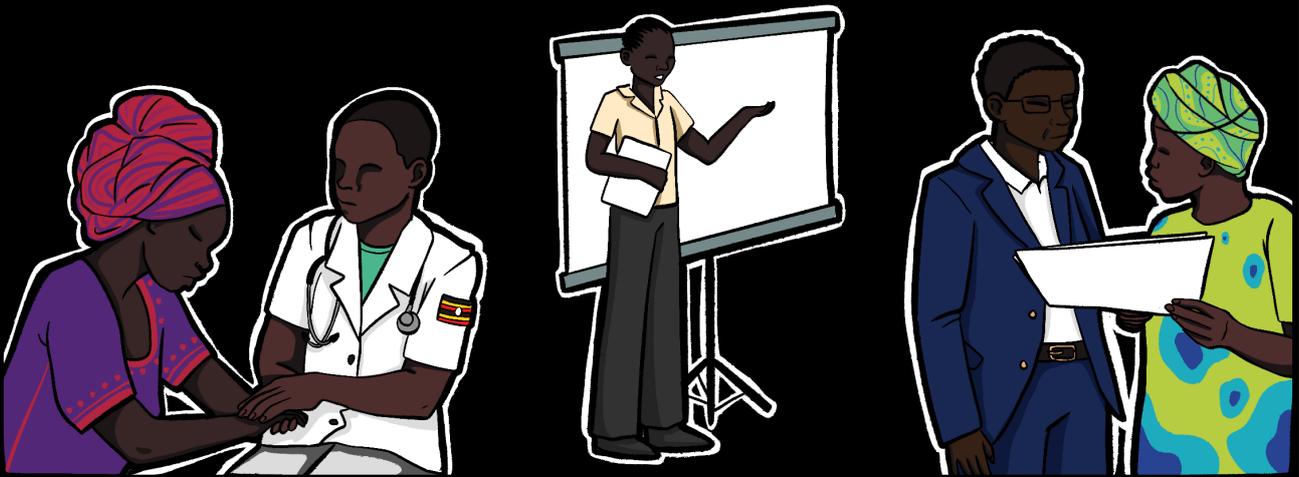

Stigma, isolation and discrimination...

All this leads to human suffering

At Taala Foundation, we are trying to change this...

We provide mental health care, train healthcare providers, generate knowledge and advocate for legal and social change

We want a Uganda where all citizens have the right to life, health and dignity

Join us in making this Uganda a reality
